## Automated Solar Panel Cleaner

### Automated Panel Cleaner, Retrofit Upgrade for Mega G1 & G2

A lot of our older towers are still out there, working hard, but not always in ideal conditions. In high-dust areas, remote regions, and places with limited access, solar panels don't stay clean for long. And when they're not clean, they don't charge properly. That means reduced battery life, more maintenance, and compromised performance, all from something as simple as panel soiling.

The automated panel cleaner is our answer. It retrofits to existing Mega G1 and G2 towers, with no need for full replacement. Keeping your panels clean without manual scrubbing or downtime. Just consistent, automatic cleaning that gets on with the job.

- ✓ Automated Panel Cleaning
- ✓ Better Charge, Better Battery
- ✓ Built for Remote Conditions
- ✓ Extended Product Support
